

Build Your First AI Project in 60 Minutes

A free, hands-on live workshop for final-year engineering students (2027 batch).

NEXT SESSION Sat, 17 Oct 2026, 3:00 pm IST	REPEAT SESSION Sat, 24 Oct 2026, 3:00 pm IST	REGISTRATION CLOSES Wed, 14 Oct 2026
--	--	--

WHAT YOU LEAVE WITH

- A **live public link** to an AI app you built, ready to add to your resume the same evening.
- A **certificate** with your name and your project title, ready for LinkedIn.
- A **project story** you can walk an interviewer through, from the first prompt to the deployed app.

THE HOUR, MINUTE BY MINUTE

- **0–10 · Set up.** Open Google Colab and add your API key.
- **10–40 · Build.** Make an app powered by a large language model, using Gradio.
- **40–55 · Deploy.** Publish it on Hugging Face Spaces and get a public link.
- **55–60 · Share.** Get your certificate and add the project to LinkedIn and your resume.

WHO IT IS FOR

Final-year B.Tech/BE students of every engineering branch: CSE/IT, ECE, EEE, Mechanical, Civil, Chemical, Biotech and others. When you register you pick a project idea from your own branch. No coding background is needed.

WHAT YOU NEED

A laptop, a stable internet connection and a free Google account. All the tools are free.

HOW TO JOIN

- Go to **workshop-growth-os.vercel.app** and log in, or create an account.
- Reserve your seat and choose your project. You get starter code for it straight away.
- Session 1 has 600 seats. If it fills, you are placed in the repeat session automatically.

This workshop page is a prototype built for the NxtWave Growth Challenge.
